## PROJECTS

### **My Portfolio Website**

Sep 2020 - Oct 2020

<https://saquib527.github.io/saquib-portfolio/index.html>

This is my portfolio Website I built this website using CSS HTML and JAVASCRIPT I used media queries to make this website fully responsive for any screen size. Many animations and modern techniques were used while building this website.

### **Ice Cream Shop(Online Food Delivery App)**

Apr 2020 - Jun 2020

Food delivery app with php backend & mysql database .I have integrated Google SignIn ,Firebase Authentication ,PayPal payment gateway Api integration, Firebase push notification. Room Database and I am working on realtime order tracking like Zomato

## Class Routine

Feb 2020 - Mar 2020

<https://play.google.com/store/apps/details?id=com.saqib.classroutine>

This app uses the SQLite database to save and retrieve all your college/school routines.

You can save and update your routine when your routine changes.

This app shows you the subject name, teacher name, timing and room no of your class.

## Status Saver

Nov 2019 - Jan 2020

<https://play.google.com/store/apps/details?id=com.saqib.statussaver>

This App Saves all your friends status from WhatsApp. Integrated Admob ads for monetisation. I used Fragments with ViewPager , NavigationView, VideoView, PhotoView and Swipe gesture. Implemented SplashScreen, Firebase Analytics and Crashlytics.

## PDF Reader App

May 2019 - Sep 2019

<https://play.google.com/store/apps/details?id=com.saqib.pdfreader>

PDF Reader App uses storage permission to list all PDF files from your phone. I used Async Task to load PDF in background,I monetise the App with Banner,Interstitial,Native Advanced Admob ads.Used Firebase Analytics and Firebase Crashlytics.

## Programming Quiz App

Oct 2018 - Nov 2018

In this project we ask questions from various programming language like java etc. and at the end we show number of right answer and wrong answer to the user and their total points.

## Technical Saquib(YouTube Channel App)

Apr 2020 - Present

In this App I used Youtube Data API to fetch all videos and Playlist of channel using Retrofit on clicking videos I played these videos using Youtube Android Player API.

I also fetched videos comments and statistics such as total views , likes etc.

## Chat App

Sep 2019 - Present

This is a realtime chat app in this app I used Firebase database ,Firebase Authentication,Firebase storage,Firebase cloud Messaging.
